Surveillance

Using innovative technology combined with many years of experience we have succeeded in combining design, easy to use, options and price.

Easy Pay is produced in Denmark and is delivered as standard with a 10.4" touch screen, voice and our well-known wireless tag technology. Possible control of +30 machines.

The front of the system have integrated multi touch and made of toughened 4 mm glass. The hardware is a strong Intel CPU with Windows Embedded® as platform.  
- At the forefront of development!

Many possible applications in laundries, solariums, bathing rooms etc.

Very user-friendly. You choose machines by pressing directly on the screen and a voice will guide you through the purchase.

Easy Pay is MobilePay certified. Users are able to pay directly with  MobilePay™ - choose machines and pay with MobilePay.

MobilePay payment can be combined with both cash- and credit system.

Cash system means that the users have an amount on their tag. The caretaker can easily transfer amounts via the Internet.

Using a credit card system the customers' purchase will be made up monthly and sent directly to the administration office via an e-mail. The amount will then be paid together with the rent.

The integrated internet part is very easy to use and includes many options for the users and the administration. Furthermore we have our EasyLaundry app to smartphones, where users can book time, keep an eye with their use or see if laundry is free etc.
